

- Instalirati xampp, instalirati python interpreter npr.  
C:\xampp  
C:\Users\Pero\AppData\Local\Programs\Python\Python35
- Nakon pokretanja kontrolnog panela xampp-a startovati Apache te proveriti:  
127.0.0.1/dashboard/

- Proveriti u fajlu C:\xampp\apache\conf\httpd.conf da li je postavljeno

```
LoadModule cgi_module modules/mod_cgi.so
```

```
<Directory "C:/xampp/htdocs">
    Options Indexes FollowSymLinks Includes ExecCGI
    AllowOverride All
    Require all granted
</Directory>
```

```
<Directory "C:/xampp/cgi-bin">
    AllowOverride All
    Options +ExecCGI
    Require all granted
</Directory>
```

```
AddHandler cgi-script .cgi .pl .asp .py
```

- Sadržaj fajla C:/xampp/cgi-bin/mptest.py  

```
#!/C:/Users/Pero/AppData/Local/Programs/Python/Python35/python.exe"
print ("Content-type: text/html\n\n")
print ("Evo, radim ...")
```

- Poziv nakon pokrenutog Apache-a:

```
localhost/cgi-bin/mptest.py
```
