

NOVELIC is the world's leading self-sustaining provider of mmWave radar sensors, perception solutions, and full-stack embedded systems. Our portfolio is supported by strong competence, quality of work, and a holistic approach gathering all modern electronics fields and software engineering under one roof, connected through lean principles and processes.

NCORE is a division within NOVELIC that offers premium embedded engineering capabilities, including full-stack embedded software development, systems engineering, electronics, and mechanics, HIL&SiL test systems, as well as analog and digital chip design. Our clients include top automotive OEMs, Tier 1 companies, and blue-chip industrial companies.

We invest in excellence, offer excellence and ask for excellence.

We are pleased to enable students of the final years to be a part of our internship program in the area of:

Software Testing

As an intern within Novelic internship program, you will be writing unit tests, and performing integration tests for various company projects. During the learning process, you will work closely with our development team on defining test scenarios and provide feedback for defects and missing features.

What competencies we are looking for:

- Final year/master studies at relevant University in the area of Computer science/Electronics
- Knowledge of one or more general-purpose programming languages (C, C++, Python) is preferred
- Knowledge of git is a plus
- Embedded SW knowledge is a plus
- Solid knowledge of English, both written and spoken

As a part of our team you should be:

- Interest in solving complex and time-critical problems
- Positive, motivated, and eager to learn new things
- Able to think creatively and produce "outside of the box" solutions
- Prepared to tackle new technologies

Reminder:

The internship program is with scholarship provided

If completion of the internship were to be successful, results can be used for writing of B.Sc. or M.Sc. thesis, subject to approval by the supervising professor at the University and Novelic. Moreover, satisfying results of the full-time internship will increase the chance of a full-time position within the Novelic Design Centre in Belgrade/Novi Sad/Niš to the graduated intern.

If you are interested in an internship in a dynamic environment, with the opportunity to improve your knowledge and work with some of the best engineers, send us your CV using the link below:
